KNOWTIFY

FOR COMMANDER

“It’s What You Don’t Know That Can Hurt You”™

Knowtify–Commander’s Invisible Assistant

Being able to quickly identify and act upon critical business information within COMPAS Commander is what Knowtify is all about. Knowtify is Commander’s automated system that lets you monitor critical conditions, decide what conditions to watch for, and how to respond to those conditions when they occur. Using advanced Data Mining capabilities, Knowtify can identify the precise conditions within AIMS’ accounting software that are critical to the success of your organization and notify the appropriate personnel when these conditions occur.

The Knowtify Wizard

Most sophisticated Data Mining, Alerts, or Workflow solutions require a high level of technical expertise. In other words, “only programmers need apply”. Not so with AIMS’ Knowtify. Designed with the user in mind, Knowtify provides a wizard-driven interface that lets customers easily configure the events; whom to notify, when, and how.

At the same time, Knowtify includes an advanced event design feature so that AIMS can extend Knowtify’s base functionality to address sophisticated, client-specific requirements.

Flexible, Intelligent Alerts

Content, format, and delivery. These are the 3 keys to effective alert management. Knowtify’s alert messages can contain as much – or as little – information as is required. Supported message formats include HTML, PDF, Excel, and Word. And as for message delivery methods, Knowtify includes:

- E-mail
- Pop-up Message
- Fax
- Pager
- PDA
- Cellular phone
- Web Browser

Ready-to-Use Events

Knowtify comes pre-packaged with one EventPak that allows clients to configure over 50 events found in the Commander event log. This gives our clients the ability to get up-and-running with Knowtify in just a couple of hours. AIMS can provide you with a free 30-day Trial License to experience the value Knowtify brings to your business.

Knowtify and Commander are AIMS’ enterprise-level solutions bringing corporate awareness to a whole new level within accounting software.

Give us a call and you can get started with Knowtify today.
