cmisolutions
Client Focused. Proven Results.

With margins being squeezed on gas and competition growing, now is the time to increase productivity and improve profits through better control of your business.

The Solution:

PB3™ is a c-store solution that provides tighter inventory control. PB3™ offers vendor price verification, inventory management, invoice and item scanning, fuel management, electronic invoice import and pricebook import, and extensive reporting.

PB3 functions are organized into logical, easy-to-use modules. Comprehensive online help provides instructions for using all functions and reports.

Expanded Functionality:

PB3™ also includes an export to CMIAccounting™, QuickBooks™, Microsoft Dynamics™, MAS 90™ and other accounting packages.

The Technology:

PB3™ retail pricebook management software is written using the Microsoft.NET framework with MS SQL database engine to assure optimum processing of item level inventory and reporting. Users of PB3™ enjoy the flexibility to tailor the software for the specific ways they run their business.
