## FUEL MANAGEMENT SOFTWARE

CMI's PetroCycle™ and Telvent DTN™

PetroCycle™ allows users a seamless interface to capture pricing, invoices, BOL, and credit cards provided by your DTN service.

Go green with CMI's PetroCycle  
Fuel Management Software.

CMI's PetroCycle™ fuel management software is designed to minimize and eliminate paperwork. The interface, developed with Telvent DTN™, allows for an electronic interchange of the following:

- Rack price updates
- Supplier invoices
- Supplier EFT draft notifications
- Electronic bills of lading
- Credit card transactions

### Import Critical Information in Real Time

DTN converts over eight million documents per year into common electronic formats which are integrated directly in CMI's PetroCycle™ accounting package.

### Add value with DTN Data Integration and CMI's PetroCycle™

Most fuel distributors are subscribers of DTN. CMI PetroCycle™ clients benefit with timely and accurate electronic bill of lading processing via DTN. DTN's Fuel Admin and CMI give you the competitive edge.

You can eliminate costly paper handling and inevitable manual re-entry errors. Hours a day are shaved from accounting processes and employees are free to pursue more profitable activities.

### Stay in Sync

CMI's price change interface with DTN Fuel Buyer™ is the next generation of fuel price management tools used to ensure optimal efficiencies. Streamline operations and improve margins with centralized access to integrated rack prices, contract prices, and discounted fuel prices throughout your organization.

DTN Fuel Buyer™ Price Exports keep your fuel buyers, price administrators, and PetroCycle™ fuel software in sync.

- Capture all your supplier prices, including intra-day moves plus invoices and credit card transactions
- Automate generation of derived prices to support contracts and other special prices
- Rapidly identify and manage price changes and exceptions
- View, analyze, manage, and export prices in your business terms
- Save manual entry and reconciliation time
- Lower the cost of product and respond faster to market changes to protect margins

Join other fuel marketers who have increased their volume and productivity with less staff with CMI's PetroCycle™ and Telvent DTN™ Fuel Interface. Call today and let us customize a solution for you.

\*Telvent DTN provides services worldwide delivered 24/7 for a monthly fee based upon level of service.
